# THE "HOME SEEKER."

THE THOUSAND COPIES OF THE "HOME SEEKER" were published last month and placed in the hands of those coming into the State in search of homes Our agent at Ogden goes into the cars and places a copy in the hands of each head of a family and single person. The "HOME SEEKER" is the best advertising medium ever offered to those who wish to extend their business to new settlers. To hotel men and real estate agents it is invaluable. An advertisement in an ordinary publication, promiscuously distributed, does not meet with more than one customer out of every hundred people which it reaches. The "HOME SEEKER" is distributed only to those who are coming here with a desire of buying immediately. Not a single copy is wasted. We have received a solid support from the business community of the northern half of the State. The continuous publication of the "HOME SEEKER", is distributed and can be sold by an advertisement with us than any other way known. We shallmakethe "HOME SEEKER", saumed fact. A Case Resembling that of Gen. Grant.

Some ten years ago I had a scrotulous sore on my right hand which gave me great trouble, and under the old time treatment healed up, but it had only been driven into the system by the use of potash and mercury, and in March, 1882, it broke out in my throat, and concentrated in what some of the doctors called cancer, eating through my cheek, destroying the palate and lower lip, then attacked my tongue, palate and lower lip, destroying the palate and under lip entirely and half my tongue, eating out to the top of my left cheek bone and up to the left eye. I could not eat any solid food, but subsisted on liquids, and my tongue was so far gone I could not talk. Such was my wre ched, helpless condition the first of last October (1881), when my friends commenced giving me Swift's Specific. In less than a month the eating places stopped and heating commenced, and the learfing aperture in my cheek has been closed and firmly knitted together. A process of a new under lip is progressing finely because an appeal to the country under the learning a small puise containing a smal ENCE. Mr. Cummings responded as follows: the eating places stopped and neutring commenced, and the fearful aperture in my cheek has been closed and firmly knitted together. A process of a new under lip is progressing finely, and the tongue, which was almost destroyed, is being recovered, and it seems that nature is supplying a new tongue. I can talk so that my friends can understand me, and can also cat solid food again. If any doubt these facts, I would refer them to Hon. John H. Traylor, State Senator of this district, and to Dr. T. OUT OF HIS OWN MOUTH. The San Francisco Spirit of the Times has unearthed a bit of testimony to the truth of the assertion that Congressman Henley is not a citizen of the United States, that appears to be conclusive. Under the rule that a man may not deny his own statements, and is bound by them, it is difficult to conceive how Mexican citizen Henley can longer claim the rights of citizenship in the United States, or consistently present himself for a seat in Congress in De cember next. According to the Spirit, on Henley's return to California, in 1865, stationed at the Presidio, San Francisco. sent him a communication, demanding to know what his business and intentions were. On the 7th February, 1865, he re veived a reply from Henley, covering several closely-written pages. He denied being sent here by "Duke" Gwin; saying that their relations were simply those of friendship. He said he was endeavoring to secure 100,000 acres of land in Mexico for colonization purposes, and wished to secure co-operation in that particular. Towards the close, he says: "I am a citizen of Mexico. I presented an application to Emperor Maximilian for naturalization, and the papers of naturalization were furnished me fully in accordance with my request, a record of which is on file in the office of the French Counsul in this city and which can be easily procured." He then said: "I am now settling up some business here of a private nature, prepara tory to my return to Mexico." The Spirit alleges that this letter was dated February 7, 1865, and that on February 11, 1865, General McDowell, then commanding this division, forwarded it to Edwin M. Stanton Secretary of War, and that it now reposes

THE heat in New York on the 16th inst. was intense. The thermometer climbed to 95°, and men and women by the hundred were prostrated, and some died because of the stifling atmosphere. Here in Sacramento 95° of heat causes little or no discomfort. In New York the air is humid, numbers, in its home and general circulation the streets narrow, and the buildings high. The pavements and walls retain the heat and give it off at night. The avenues thus become hot air flues, the moist atmosphere surcharged with heat oppresses the lungs and heats the blood, and as a consequence the vitality of the people is fairly wilted when the thermometer registers 95° in the

shade. Here the atmosphere is dry, and not retentive of heat; our streets are broad, our walls low, and our foliage abundant. Up in the nineties it is hot, of course, but never that kind of heat that incapacitates from labor or results in any physical prostration. With the setting of the sun the air and the earth cool, and at night that ! equable temperature prevails which makes the evenings in the valley glimpses of paradise. Even in San Francisco the degree day, which was doubtless caused by the firm of heat that oppresses the people living in manner in which Hale & Norcross continued to that humid atmosphere makes the day be sustained at \$91/2@\$95%. Business was not here delightful. A great deal of popular error exists regarding summer heat in this valley; the truth is, it is not nearly so great as is popularly supposed, and hot weather is here more endurable than upon either the Atlantic or Pacific sea shores.

> It must be the rule of the law in Ohio, ince the Supreme Court has so declared it, but it puzzles the layman greatly to see into the heart of the proposition, that a State can rightfully retain that which she wrongfully takes from the citizen. The Scott law taxed the liquor business in Ohio. The Supreme Court declared the law unconstitutional-and, by the way, it was a Bench of Democratic Judges. Those who had paid in their taxes under this unconstitutional law sued to recover them. The same Court now decides that the money cannot be refunded, because it was collected prior to the unconstitutionality of the Act being declared by the

In other words, the State wrongfully collected from liquor dealers a given The New South Wales contingent, which took sum of money, but because she has possespurt in the Soudan campaign, has reached home sion, and because when the money was collected it was not known that the law under which the tax was laid was unconstitutional, and therefore void from the beginning, the State must not pay back the money to those from whom it was unconstitutionally taken. ### LOCAL INTELLIGENCE.

IMPOSED UPON .- Tuesday afternoon young half-breed Indian named Albert Chandler came to the city from the "Q' ranch, in Alameda county, and at the de pot was met by a hackman, who insisted that the Indian boy should ride with him. He finally got into the hack and was driven around town, but he says he frequently requested to be let out. After drivng him around for an hour or two, the hackman demanded nine dollars fare. The boy protested that he did not want to ride, and did not expect to have to pay any such price. Thereupon the hackman proceeded to investigate the pockets of his fare, and took therefrom, so the Indian complains, \$3 40 in coin, one gold nugget of the value of \$5, and a small quantity of gold-dust, aggregating about \$13 50. The poor fellow went to the police station in the evening and, with tears in his eyes, recounted his adventure and loss, saying that he had no money to get either food or bed. It transpires that the driver who perpetrated the outrage, upon learning that complaint had been made to the authorities, charging him with larceny, left his situation and decamped. A glance at the victim would camped. A glance at the victim would disclose to anyone that he would not be a water pressure at the water works to fall person likely to require the services of a

The matter was taken up by the Board of Trustees, who had all the employes before them, and asked them to explain, if possible, the causes which led to the scarcity of water complained of. Mr. Williams, the engineer on duty at the time of the fire, and his fireman, Mr. Longabaugh, both claimed that when the alarm came in the ordinary domestic water pressure of thirty-five pounds was on, and they had seventy-five pounds of steam. In less than two minutes the throttle was opened and the Holly pump immediately gave a water pressure of fifty pounds. Here the Holly seemed to hang. Mr. Williams knocked out one of the Holly pumps, thinking that by giving the remaining three more speed was burned d was burned was b the pressure could be raised. About eight or ten minutes after the alarm was sounded Mr. Foster, the chief engineer, came in.

On the other hand, the owners of the property destroyed, those who witnessed the conflagration and the firemen say al-most unanimously that the water pressure was insufficient, and at the early stage of the fire no pressure to speak of at all.

The Citizens' Committee took the matter up, and had a test a few days afterwards from the

SAME PLUGS USED AT THE FIRE. Fully 1,000 people were upon the ground during the test made by the fire depart-ment under the direction of the Citizens' Committee—Messrs. G. W. Carey, Rudolph Wittenbrock and Thomas B. Hall. Their report, which was published in full in this paper, concluded as follows: "We find it ult to make ourselves believe other than if the engines at the water works were ing with only thirty-five pounds' pressre, that there should have been a better apply of water at the time the fire broke out than eye-witnesses state. From these ests made to-day, aside from the tests made y your committee last year, we firmly beieve in and have every confidence in the capacity of the water works to furnish our itizens every protection against conflagration. Therefore, we conclude that in this instance the cause of the insufficiency of water supply is directly chargeable to some neglect or carelessness at the water works Your committee here recommend that your association take steps to and do confer with the Superintendent of the water works, as

Last Sunday a party of eight persons rincipally State Printing Office employes rove down to Beach's lake to have a picnic and hunt. Among them were George B. Sim.," "Ed." and Joe K. While the larger portion of the party were in camp, Ed. and Joe went down to the lake, and knocked over a hare. As they wer not going to the camp for a while, the animal was placed in the crotch of a tree, about eight feet from the ground, to be called for later. It happened that George came along presently, and the artful Ed. attracted his attention to the game. "Say George, don't that look like a hare in tha tree? Give me your gun!" ### LOCAL INTELLIGENCE.

IMPOSED UPON.—Tuesday afternoon young half-breed Indian named Albert Chandler came to the city from the "Q' ranch, in Alameda county, and at the depot was met by a hackman, who insisted that the Indian boy should ride with him. He finally got into the hack and was driven around town, but he says he frequently requested to be let out. After driving him around for an hour or two, the hackman demanded nine dollars fare. The boy protested that he did not want to ride, and did not expect to have to pay any such price. Thereupon the hackman proceeded to investigate the pockets of his fare, and took therefrom, so the Indian complains, \$3 40 in coin, one gold nugget of the value of \$5, and a small quantity of gold-dust, aggregating about \$13 50. The poor fellow that the relief station in the evening went to the police station in the evening and, with tears in his eyes, recounted his adventure and loss, saying that he had no money to get either food or bed. It transpires that the driver who perpetrated the outrage, upon learning that complaint had been made to the authorities, chargin him with larceny, left his situation and decamped. Collector Dolan returned yesterday afternoon from Folsom and vicinity, where he collected about \$300 for licenses from Chinese and others. A large portion of the amount was for the \$15 a quarter license charged those who sell liquor in quantities less than a quart. The collection of this icense from those who did not keep bars, but sold drinks by the glass for 5 and 10 cents, as the Chinese do, was resisted some time ago, but since Judge Van Fleet's recent decision in a test case, the Chinamen have all paid up on demand, including the license that was delinquent. He did not know whether the fire pressure was on or not. But very little pressure gave him all the water he wanted. He observed no change in the pressure that that he carried his game into camp, but he endeavored to dissemble, and when inmight.

Robert Cook, an employe at the same place, said he noticed the fire pressure immediately after the alarm. It was so strong that it necessitated his making a change in a pump at that place which is connected directly with the main. On cross-examination he said steam might creased the speed of the pump, but he was of the opinion that it was the fire pressure on the water main.

A drunken Indian squaw, who rooms in the third story of the Scroggs building, Tenth and K streets, created a sensation in that locality last night by smashing the glass in the windows and wildly flourishing a lighted kerosene lamp.

In Department Two of the Superior Court yesterday, in the case of Green & Trainor vs. the State of California, plaintiffs declining to amend their complaint, Judge McFarland rendered judgment for defend-ant for costs of suit. An appeal will doubtless be taken to the Supreme Court. Detective John Coffey came up from San Francisco yesterday to get the two women

The Outlook for California Hop-Growers

and Dealers. NEW YORK, June 24th .- Your reporte

o-day saw a member of the firm of Lilien thal Bros., California hop dealers, and asked him regarding the report of a re-markable glut in the market just now. "Is is true," he said, "and we can't see an prospects of improvement. California hop sell at from seven to ten cents per pound and very little is selling at that. The ex ports this year have been one-half less than t, and there is no immediate prospect o England buying hops here. When you understand that California has a surplus of from 15,000 to 25,000 bales, on which the transcontinental freight charges would amount to more than they could be sold for, you will not wonder that dealers here are worried. The market is most depressed, and is sagging down all the time. The crop prespects in New York State are very good. A member of the firm of Uhlmann Bros. id: "At present there is no money in wrices have not been so low in six years."
What is the cause?" was asked. "The reason is that there was an exceedingly rge crop last year, and as a resul is very promising. The Indian Situation.

Washington, June 24th.—The outbreal of Chevenne Indians, which was threatene year or longer. Army officials here attrib-ute it to dissatisfaction on the part of the tlemen. The Cheyenne reservation is on of the largest in Indian Territory. It com prises about 4,279,000 acres. Of this amount nore than 3,000,000 acres are controlled by attlemen, who are grazing vast herds. The Indians are divided on the question of leas ing the land, the majority apparently being opposed to it. It is said here by officials ranches. The reports on file at the office of Haggin intends entering Hidalgo for the Commissioner of Indian Affairs indicate that the leasing of the lands was the dians. These reports are from Agent Dyer, on the Chevenne reservation, who ranks as He was appointed to his present pos tion about a year ago, and immediately or assuming his duties he informed the Inte rior Department that trouble was threat ened, and that unless precautionary measures were taken an outbreak would e inevitable. He asks that 1,000 cavalry men be sent to the reservation. As a reason for his statement, Agent Dyer said his predecessor had not exercised strict control over the Indians; that they had been allowed to do as they wished. Mr. Dyer, on assuming the duties of the agency, endeavored to control the Indians. He reported

to the Commissioner of Indian Affairs that they laughed at his attempts and boasted that the Government could do nothing with them. Agent Dwyer was in Wash-ington some weeks since. He urged that 3,000 cavalrymen be sent to the reservation as soon as possible, to scare the Indians and show them that the Government had sufficient force to punish them if necessary. He thought if this method of influencing m was adopted they could be controlle ithout bloodshed on either side. He said the Cheyennes were as warlike as the uld put 1,200 to 1,500 warriors on the warpath at any time.

SAN FRANCISCO. ap28-4ply A QUESTION ABOUT Brown's Iron Bitters ANSWERED.

The question has probably been asked thousands of times, "How can Brown's Iron Bitters cure everything?" Well, it doesn't, But it does cure any disease for which a reputable physician would prescribe 180N Physicians recognize Iron as the best restorative agent known to the profession, and inquiry of any leading chemical firm will substantiate the assertion that there are more preparations of iron than of any other substance used in medicine. This shows conclusively that iron is acknowledged to be the most important factor in successful medical practice. It is, however, a remarkable fact, that prior to the discovery of BROWN'S IRON BITTERS no perfectly satisfactory iron combination had ever been found. BROWN'S IRON BITTERS does not injur

cures Indigestion, Biliousness, Weakness, Dyspepsia, Malaria, Chills and Fevers, Tired Feeling, General Debility, Pain in the Side, Back or Limbs, Head the and Neural-gia for all these ailments Iron prescribed daily. BROWN'S IRON BITT RS, however, does minute. Like all other thorough medicines, it acts slowly. When taken by men the first symptom of benefit is renewed energy. The muscles then become firmer, the digestion improves, the bowels are active. Inscomen the effect is usually more rapid and marked. The eyes begin at once to brighten; the skin clears up; healthy color comes to the checks; nervousness disappears; functional derangoments become regular, and if a nursing mother, abundant sustenance is supplied for the child. Renomber Brown's Iron Bitters is the ONLY iron medicine that is not injurious. Physicians and Druggists recommend it.
